Mini-Symposium
Contact Mechanics

Dear Colleagues,

The jubilee **20th International Conference on Computer Methods in Mechanics** will be held in Poznań on August 27th – 31st, 2013. A number of Mini-Symposia will be organized within this conference. The updated information can be found at the conference website

The aim of this message is to cordially invite you to participate in the scheduled **Mini-Symposium on Contact Mechanics**. The planned scope of this Mini-Symposium should cover a full variety of related topics including:

- 2D and 3D problems
- friction and wear
- multi-scale and multi-field problems
- rough surfaces - statistical and fractal models
- geometry and kinematics description of contact
- covariant description of contact interfaces
- elasto-visco-plasticity
- optimization in contact analysis
- error analysis
- variational inequalities
- contact constitutive laws including anisotropy
- genetic algorithms
- interface contact and special finite elements

If you would like to take part in this Mini-Symposium you are invited to submit online your Abstract before February 28th, 2013.

Author's instructions and templates are available at the conference website. To upload your files you must register first at the Participant's Area.

We would be very grateful if you could let us know by email as soon as possible if you plan to submit a contribution to this Mini-Symposium and to provide its tentative title.

Looking forward to hear from you soon and meet you in Poznań in August 2013.

Sincerely yours

Ryszard Buczkowski
Przemysław Litewka
Alfred Zmitrowicz
